[linkedin.com/in/v-hariprasath](https://www.linkedin.com/in/v-hariprasath)

SUMMARY

- Front-End Developer with over 3 years of professional experience in designing and developing dynamic, responsive, and user-friendly web applications.
- Proficient in React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, and CSS3, with a strong understanding of modern front-end frameworks and libraries.
- Skilled in building component-based architectures to ensure scalability, reusability, and maintainability of code across projects.
- Experienced in RESTful API integration to seamlessly connect front-end interfaces with back-end services.
- Strong knowledge of UI/UX design principles, focusing on creating clean, intuitive, and visually appealing user interfaces.
- Adept at debugging, troubleshooting, and performance optimization to enhance application speed, reliability, and overall user experience.
- Familiar with state management tools such as Redux, React Query, and React Hooks for efficient data flow and component interaction.
- Experience working directly with overseas clients (including a Dubai-based client) to gather requirements and deliver solutions aligned with business needs.
- Hands-on experience with cross-browser compatibility and responsive design, ensuring consistent performance on multiple devices and platforms.
- Proficient in using version control systems like Git/GitHub for collaborative development and code management.
- Strong problem-solving abilities with a keen eye for detail and a commitment to delivering high-quality code.
- Collaborative team player with excellent communication skills, capable of working in agile development environments and meeting tight deadlines.
- Passionate about continuous learning and staying updated with the latest front-end technologies, trends, and best practices to deliver cutting-edge solutions.

EDUCATION

B.Tech in Mechanical Engineering	2017 – 2021
Alpha College of Engineering and Technology, Pondicherry	

EXPERIENCE

Oceanssoftwares Private Limited	Nov 2025 – Present
Redblox Technologies Pvt Ltd	Dec 2022 – Jan 2025

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, MUI
State Management: Redux, React Query, React Hooks
Backend: PHP, Laravel (Basic), CodeIgniter (Basic)
Database: MySQL
Charting: ApexCharts
Tools: Git, Postman, VS Code, WordPress

PROJECTS

Project 1 – Chit App (PHP)

Roles and Responsibilities

- Developed a responsive front end for a chit fund management application using HTML5, CSS3, JavaScript, and PHP.
- Built user interfaces for chit group creation, member management, and payment/subscription tracking.
- Integrated REST APIs to handle chit scheme data, transaction history, and payment status updates.
- Ensured cross-browser compatibility and responsive design across devices.
- Collaborated with the backend team to debug API issues and ensure smooth data flow.

Project 2 – CNI

Roles and Responsibilities

- Developed and maintained UI components for the CNI application using React.js and JavaScript (ES6+).
- Built reusable components and integrated REST APIs for dynamic data rendering.
- Implemented form validations, state management, and UI enhancements based on functional requirements.
- Collaborated with the team on bug fixes and performance improvements.

Project 3 – STAR

Roles and Responsibilities

- Built responsive front-end modules for the STAR application using React.js, JavaScript (ES6+), HTML5, and CSS3.
- Developed reusable UI components and integrated APIs for data handling.
- Worked on UI/UX improvements and cross-browser compatibility.
- Participated in testing, debugging, and feature enhancements.

Project 4 – Syncraze – Business Management Platform

Frontend Developer | React.js / Next.js / TypeScript

Roles and Responsibilities

- Worked on the Syncraze business management platform, building and enhancing responsive web pages using React.js, Next.js, TypeScript, and MUI.
- Developed reusable UI components and common layouts to maintain a consistent design across different modules.
- Integrated REST APIs and handled API responses, loading states, form submissions, and error scenarios.
- Worked on modules such as Dashboard, User Security, License Management, Site Settings, Inventory, Procurement, Fleet, HR, and HSE.
- Implemented dynamic forms, tables, filters, breadcrumbs, dialogs, and validation based on functional requirements.
- Worked with Redux and React Query for managing application state and API data.
- Integrated charts and dashboard data using ApexCharts to display business-related information in a clear format.
- Fixed UI issues, API-related issues, and improved existing components based on development and testing feedback.
- Worked on Excel upload functionality for handling bulk data insertion and updates.
- Collaborated directly with the Dubai-based client to understand requirements and deliver features aligned with client needs.
- Used Git for version control and collaborated with the development team during feature development and bug fixing.

Project 5 – Gaston Web Application

Roles and Responsibilities

- Developed responsive and user-friendly UI components using React.js, ensuring cross-browser compatibility and optimized performance.
- Implemented state management with React Hooks to handle dynamic data and improve component reusability.
- Integrated REST APIs to fetch and render real-time data seamlessly into the application.
- Built reusable and modular components to streamline development, reduce redundancy, and improve maintainability.
- Optimized application performance by minimizing re-renders, lazy-loading components, and following best coding practices.
- Collaborated with backend teams to debug API issues and ensure smooth data flow between frontend and backend.

- Applied responsive design principles (HTML5, CSS3, Flexbox, Grid) to provide a consistent experience across devices.

Project 6 – Melloplex Web Platform

Roles and Responsibilities

- Designed and developed responsive and scalable UI components using React.js and Next.js, ensuring a clean and maintainable architecture.
- Implemented React Query for real-time API integration with optimized caching, reducing redundant network requests and improving app performance.
- Applied mobile-first and cross-browser design principles, delivering a seamless experience across devices and screen sizes.
- Collaborated with backend developers to integrate REST APIs, ensuring smooth data flow and efficient state management.
- Worked closely with UI/UX teams to translate wireframes and mockups into pixel-perfect interfaces, enhancing user experience.
- Improved application performance by applying code-splitting, lazy loading, and other Next.js optimization techniques.
- Followed best practices in version control, code reviews, and agile methodologies, ensuring consistent delivery of high-quality features.
